6:30 PM to 8:30 PM

at

The New York Aquarium
– Education Hall Building

602 Surf Avenue
Brooklyn, NY 11224

Join the Science and Resilience Institute at Jamaica Bay and its partners for

CLIMATE FORUM SERIES HURRICANES & HURRICANE PREPAREDNESS

How are hurricanes formed?

What is the outlook for hurricanes this year?

What can I do to prepare? What can I do in an emergency?

Hurricanes are among nature's most powerful and destructive phenomena. Hurricanes are most common during June 1 to November 30. Strong winds, waves, storm surge, flooding are a few of the many hazards that are associated with hurricanes.

New York City has experienced hurricanes and we have learned to increase our preparedness for these hazards.

Learn about how hurricanes are formed, the outlook for this year, and how to prepare for a hurricane emergency in New York City.
