

ADA-Compliant Bait Station

Friends of the East River Esplanade constructed the *El Barrio Bait Station*, enabling anglers along the East Harlem Esplanade to clean and safely handle their catch, and use the guide to identify common fish. The ADA-compliant prototype designed by Jacobschang Architecture uses solar power to accommodate anglers who fish after dark, and a pump to supply non-potable water to clean catch. Recipient of the 2020 MASTerworks Architecture Design for Park Amenities Award, and 2021 American Institute of Architects (AIA) NYS Excelsior Award in acknowledgment of its impact in the community and design excellence.

NYS Marine & Coastal District Small Grants Program: 2020-2021

Six awards were given in 2020-2021
and two are highlighted on this card.

**Purchase the NY State
Marine and Coastal District
License Plate to support
marine recreational
fishing education projects.**

Look for the License
Plate with the Striped
Bass And Morone
Lighthouse

The New York State Marine and Coastal District License Plate supports not-for-profit organizations that apply to the Marine and coastal district of New York conservation, education, and research small grants program, established under NYS Environmental Conservation Law Article 13, Title 5 Section 13-0501. This fund is used to "promote sport fishing, increase participation in recreational angling, increase public awareness and appreciation of aquatic natural resources, encourage conservation of fisheries resources, or promote research relating to the marine and coastal district of New York". A three-member Board appointed by the governor, temporary president of the senate, and speaker of the assembly, oversees this fund, and this grant program is presently being administered through New York Sea Grant.

The ERIA Project

Established by collaborators at Brooklyn Bridge Park Conservancy, Randall's Island Park Alliance, and Farmingdale State College, *The East River Ichthyology Alliance (ERIA) Project* uses standardized methods to collect and archive data about fish species diversity and water quality in the East River, at public fishing clinics and other community science events. Anglers and other partners who received special training can contribute information about their catch to *The ERIA Project*, and a manuscript describing this project was published in the *Urban Naturalist*, No. 38 (2020).
